### **DETAILED ACTION**

The text of those sections of Title 35 U.S.C. Code not included in this action can be found in a prior Office action.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Admitted Prior Art in view of Puziol et al. for reasons of record.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Admitted Prior Art in view of Kojima et al. for reasons of record.

### **Response to Arguments**

Applicant's arguments filed 5/5/05 have been fully considered but they are not persuasive.

Regarding applicant comments directed to the rejection of claims 1-3 under 35 U.S.C. 103(a) over Applicant's Admitted Prior Art in view of Puziol et al., the applicant argues that the examiner's conclusion of obviousness is based upon improper hindsight reasoning. It must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971). In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness

Art Unit: 2817

can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, as stated in the previous Office Action, the motivation to combine was found in the secondary reference, Puziol et al., (not from the admitted prior art) that teaches transparent D-type FF having level-sensitive clock inputs and thus reduces the effort required to avoid race conditions. Therefore, one of ordinary skill in the art would have been motivated to combine at the time the invention was made.

Regarding applicant comments directed to the rejection of claims 1-3 under 35 U.S.C. 103(a) over Applicant's Admitted Prior Art in view of Kojima et al. and applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized, as mentioned above, that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971). In response to applicant's argument that given the different problems solved by the present application and Kojima, there is no suggestion to combine the references, the examiner recognizes

that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, as stated in the previous Office Action, the motivation to combine was found in the secondary reference, Kojima et al. that teaches transparent D-type FF providing a fast performance and low power consumption. Although applicant argues that Kojima has nothing to do with the PSBT encoder, the teaching of Kojima on the transparent D-type FF is the element of interest and has the benefits that one of ordinary skill in the art would have been motivated to combine at the time of the invention.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
